

NOT ONLY WHITE®

Not Only White's collection of bathroom products is designed and curated to create simple pleasures in life. Brought back to the basics, yet always with a touch of warmth and elegance.

Our collection is inviting to touch, as how it should be in a bathroom. A bathroom is a sensory and sensual space. A space where you feel at ease from the moment you step in. To refresh for just a few minutes or fully immerse and lose track of time.

We realize options are limitless these days and every decision takes your time. Therefor at Not Only White we aim to keep it simple and clear. We believe in luxury, but always sophisticated and modest.

Not Only White is dedicated to make sure our collections are well-balanced, refined and meet your needs. This way we can create simple pleasures for you.

Refined luxury, simple pleasures.

Custom Made by Not Only White explained

With Not Only White, you can create the perfect solution for every bathroom or toilet, be it at home, in a hotel, restaurant, office, etc. This is achieved by having our products made to order according to the client's wishes, based on our collection elements.

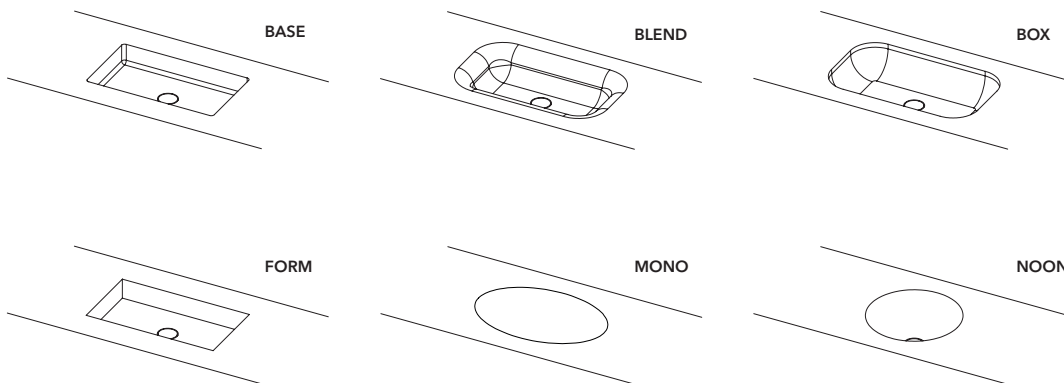

Our *Custom Made* system provides the flexibility to adjust the washbasin's width, depth and height accordingly to the client's needs and wishes. Even the position and number of bowls can easily be modified. *Custom Made* also means having the ability to leave out what is unnecessary. In the case that a wall covers one side edge of a washbasin, this edge is not visible and thus not needed. It will be left out in the calculation of the product pricing.

In the next pages, our *Custom Made* system will be explained in detail.

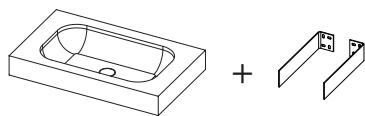

1. Choose the bowl design

The Not Only White collection offers a range of 6 different designs: Base, Blend, Box, Form, Mono and Noon.

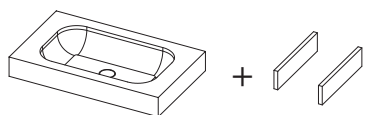

2. Choose the composition

The next step is to define the composition. Our collection offers washbasins in many variations.

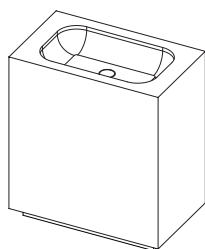

Washbasin wall-mounted

The washbasin is mounted to the wall with brackets.

Washbasin top-mounted

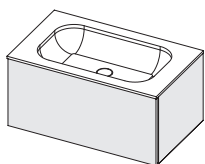

The washbasin has to be mounted on top of a shelf or cabinet and is supplied with fixed plywood ribs for support.

Washbasin floor-standing

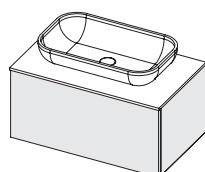

The washbasin has a 50mm high plinth and 4 adjustable feet.

4 ways to combine a custom made washbasin with a cabinet:

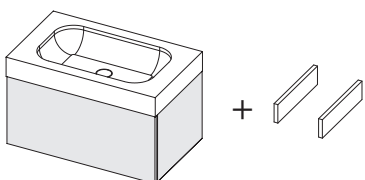

Washbasin in cabinet

The thin washbasin top is directly supported by the cabinet body and the bowl sits inside the cabinet.

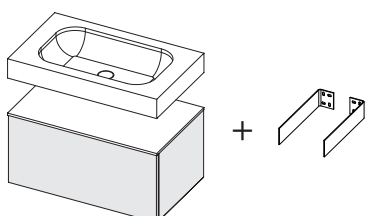

Countertop washbasin on cabinet

The washbasin is a countertop model and sits on top of a cabinet (or shelf). Not Only White offers 4 countertop washbasins: Box, Nest, Noon and Still.

Washbasin on cabinet

The washbasin sits directly on top of the cabinet. Ribs are added underneath the washbasin. These ribs strengthen the washbasin and are necessary to install the washbasin onto the cabinet.

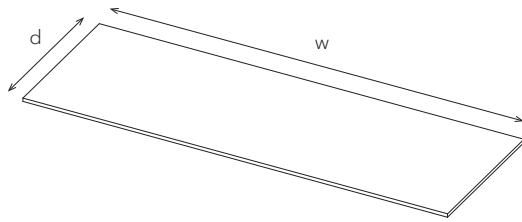

Washbasin separate from cabinet

The washbasin is supported by brackets.

**custom
made**
BY NOT ONLY WHITE

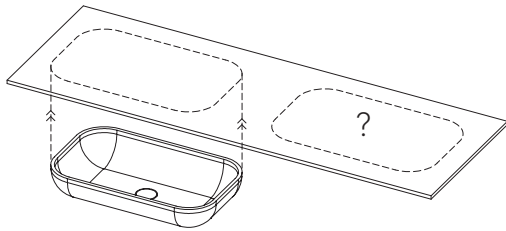

3. Define the dimensions

Top

Whether you want a wall-to-wall or a smaller sized 'free-hanging' washbasin, start with deciding on the dimensions of the top. This will also determine the size and number of bowls that the top can accommodate.

Top is calculated in m²

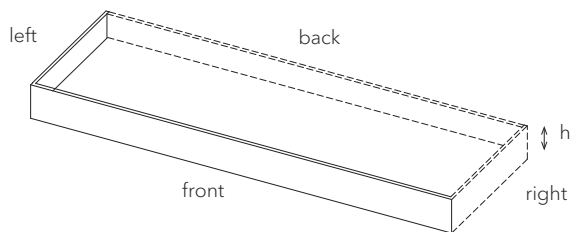

Bowl(s)

Now that you know the overall dimensions, the next step is to determine the bowl(s) of your choice (e.g. Base, Blend, etc....) to create the look of your Custom basin.

Not Only White offers multiple sizes for most bowl designs. You have the choice of fitting **one or multiple bowls** in your top.

Bowls are calculated per piece

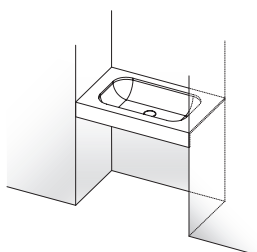

Edge

Edges can be added to the top and vary from 20mm up to 900mm high. A washbasin with a 900mm high edge is what we call a floor-standing model.

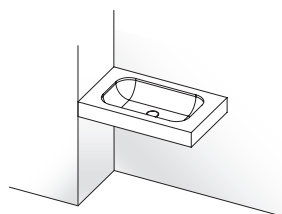

Have a look below which edges are necessary in your situation.

Edges up to 200mm high are calculated per running meter

4. Continue with more options

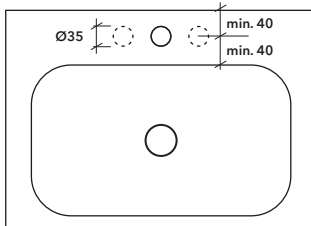

Tap hole

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

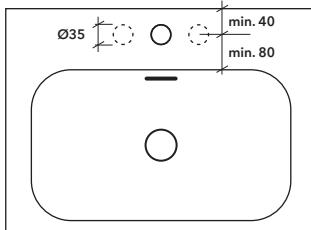

Tap hole is calculated per bowl

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

Top-mounted tap with overflow:

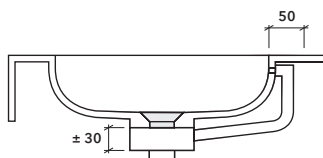

Overflow

An overflow (code **OH50**) is used for bowls equipped with a closable drain.

Overflow is calculated per bowl.

The overflow drain tube needs at least 50mm at the back of the washbasin to fit.

The overflow ring, that drains excess water into the drain, adds 30mm of height underneath the basin drain.

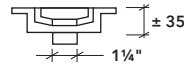

Side view

Drain type

Depending on how the washbasin needs to look and work, you can choose from different drain types for Base, Blend, Box, Form, Mono and Noon.

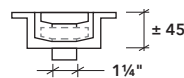

1 FLUSH DRAIN free flow drain

All Himacs bowls (except for Kuub handrinse and Scape) are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

2 POP-DOWN DRAIN closable drain

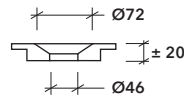

Our Pop-down drain has the same aesthetic as the Flush drain but it can be pressed down to close the drain.

Pop-down drain is calculated per bowl

Not Only White recommends to pair the Pop-down drain with an overflow.

3 DR72 DRAIN HOLE for a third party drain

The DR72 drain hole is used for third party drains, both closable and non-closable.

DR72 drain is free of charge

Not Only White recommends to pair a third party closable drain with an overflow.

Materials and colors

Base, Blend, Box, Flat, Form, Frame, Kuub, Mono and Noon are made of S28 Alpine White Himacs®.

Accessory range Basq and the bath trays are made of Himacs® and come in different colors. Basq also comes in Natural Oak veneer.

Axis, Ease, Fine, Loop and Muse baths as well as Aim, Fuse, Nest, Pose and Still washbasins are made of white Velluto® biobased.

Aim is available with Soft Touch coating on the outside in RAL 9005.

Fuse is available with Soft Touch coating on the outside in RAL 5008 and RAL 7044.

Pose, Nest and Still washbasins as well as Ease, Fine, Loop and Muse baths are available with Soft Touch coating or Palette finish.

Fall is available in S28 Alpine White, G004 White Quartz, G038 Sea Oat Quartz and G100 Peanut Butter Himacs®.

Scape is available in S28 Alpine White and S22 Black Himacs®.

Palette finish

Palette is a two-component acrylic-polyurethane and pigmented paint, which is applied on our Velluto® biobased solid surface collections. On the inside and outside.

Palette is easy to clean and UV resistant. Because of the availability in all NCS and RAL colors, design professionals can create a unique and distinctive aesthetic appearance in both residential and commercial projects.

Soft Touch coating

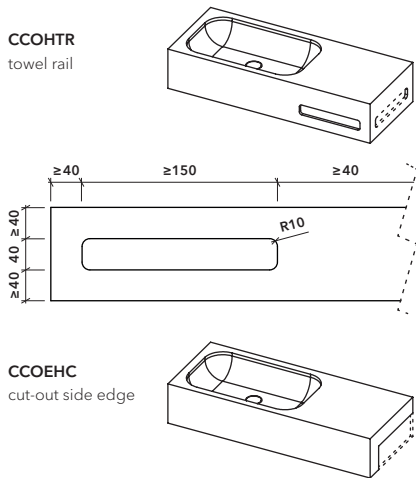

Soft Touch finish consists of two layers. The first layer is a two-component acrylic matt base coating with excellent adhesion and light resistance. The second layer is a two-component transparent polyurethane coating with soft touch effect in order to create that distinctive homogeneous, velvety tactile experience.

Because of the availability in all NCS and RAL colors, design professionals can create a unique and distinctive aesthetic appearance in both residential and commercial projects.

5. Cut-outs and edge finishing

Edge cut-out

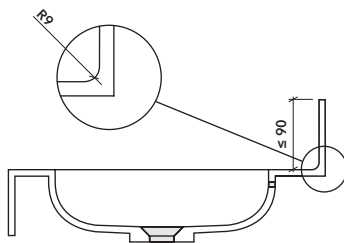

Edge cut-outs are calculated per piece

Integrated backsplash

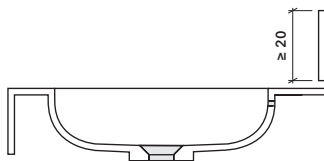

An integrated backsplash can be applied on all Himacs washbasins (code **CSP90H**) with a maximum height of 90mm.

Integrated backsplash is calculated per running meter

Note that a backsplash with a height over 90mm will be supplied as a separate piece without a radius edge.

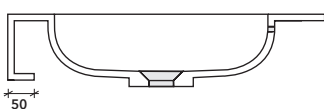

Separate backsplash is calculated per m²

Recessed edge

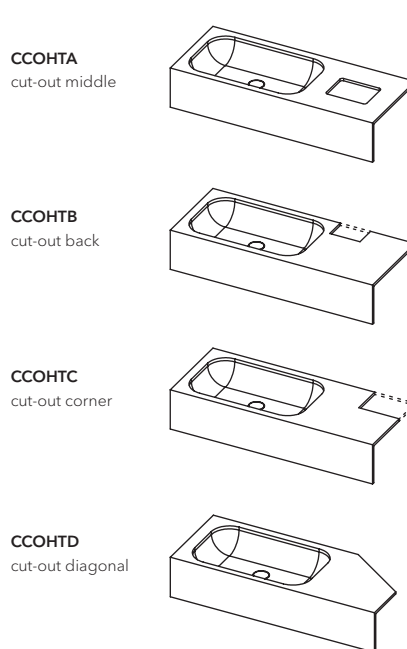

For washbasins placed on cabinets with recessed fronts, a 50mm recessed edge (code **CRE50**) is available to close off a part of the underside.

Recessed edge is calculated per running meter

Top cut-out

Top cut-outs are calculated per piece

Unit

Add the Unit for some extra storage space. Calculate the washbasin without accounting for the Unit. Then add the price of your chosen Unit size.

To view the offered Unit sizes go to page 41.

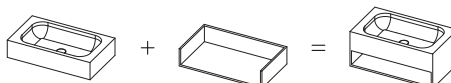

Side Unit

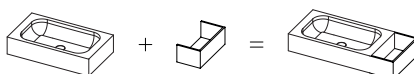

Front Unit

Bottom Unit

Top Unit

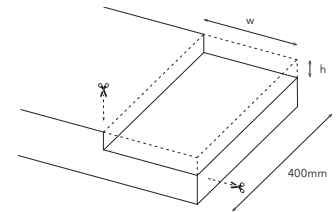

Plateau for Basq tray

To create a plateau (code **XPL**) for the Basq tray, the edge on one or both sides of the washbasin can be lowered.

Calculate the washbasin without accounting for the plateau and then add the cost of code XPL.

The width (w) and height (h) are to be defined by you.

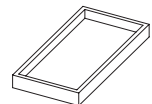

Lower side plateau is calculated per piece, regardless of its width and height

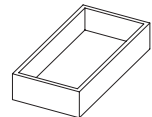

Basq tray

The Basq trays can be ordered in 7mm Natural Oak veneer or 12mm Himacs. See page 125 for all information about the Basq trays.

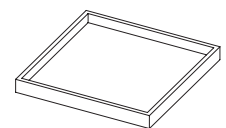

CBX20040(-NO)
w200 x d400 x h40mm

CBX20080(-NO)
w200 x d400 x h80mm

CBX40040(-NO)
w400 x d400 x h40mm

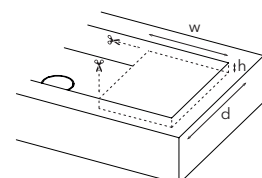

Form plateau

To create a plateau (code **XFP**) in the Form basin on the left or right side of the bowl. Calculate the washbasin without accounting for the plateau and then add the cost of code XFP.

The width (w) is to be defined by you. The height (h) is 25mm and depth (d) is 270mm.

Plateau is calculated per piece, regardless of its width

6. Brackets and ribs

Side brackets

When defining the components for a wall-mounted Made to Measure washbasin, Not Only White provides white powder coated steel brackets (code **SB...**) to mount the washbasin to the wall. The rule of thumb is to support the washbasin top approx. every 600 - 800mm.

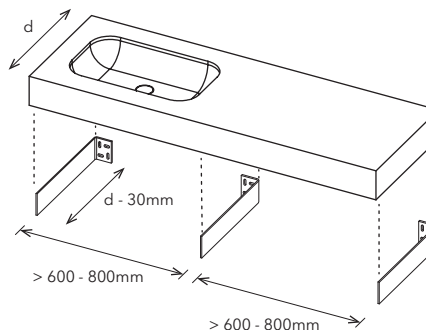

When installing the brackets, make sure they are positioned as shown in the diagram: thin side up.

We offer brackets for washbasins up to a maximum depth of 520mm in the following lengths:

SB270	bracket length 270mm
SB320	bracket length 320mm
SB370	bracket length 370mm
SB420	bracket length 420mm
SB470	bracket length 470mm

To decide which bracket length is needed, take 30mm off the washbasin depth. The first bracket option below this length is the bracket that will fit your washbasin perfectly.

Brackets are calculated per set of two; it is possible to order per half a set

Bowl bracket

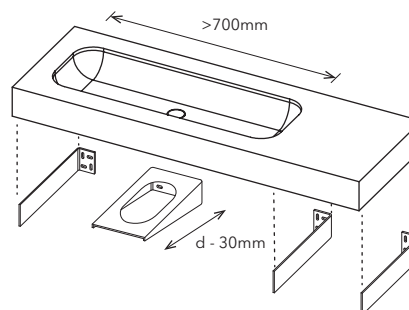

In the case a bowl wider than 700mm is being used, we recommend to support the bowl with a white powder coated steel bowl bracket (code **BB...**).

This bowl bracket is additional to the side brackets.

BB330	bracket length 330mm
BB380	bracket length 380mm

To decide which bracket length is needed, take 30mm of the washbasin depth. The first bracket option below this length is the bracket that will fit your washbasin perfectly.

Bowl brackets are calculated per piece

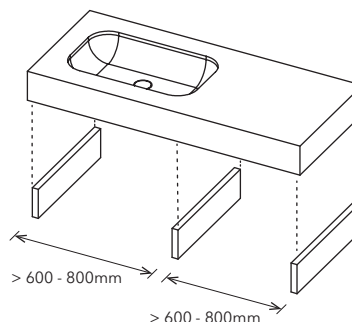

Ribs

When defining the components for a Custom washbasin to be top-mounted on a cabinet or shelf, please take into consideration that ribs, made of plywood, will be needed to properly install the washbasin.

The ribs (code **RIB**) are also positioned underneath the top to strengthen the overall structure of the washbasin. For this purpose, a rib should be placed approx. every 600 - 800mm.

Ribs are calculated per piece

Base

The Base collection consists of basic-shaped basins especially designed for the contract market. It is characterized by the 12mm radius inside the basin. This collection aims to be accessible, adaptable and easy to maintain.

Not only is Base perfect for the domestic environment, but its characteristics also make Base an ideal choice in hygienic surroundings and intensively-used restrooms, such as hospitals, exhibition centers or airports.

Design by Marike Andeweg

○ White Himacs

Washbasin layout

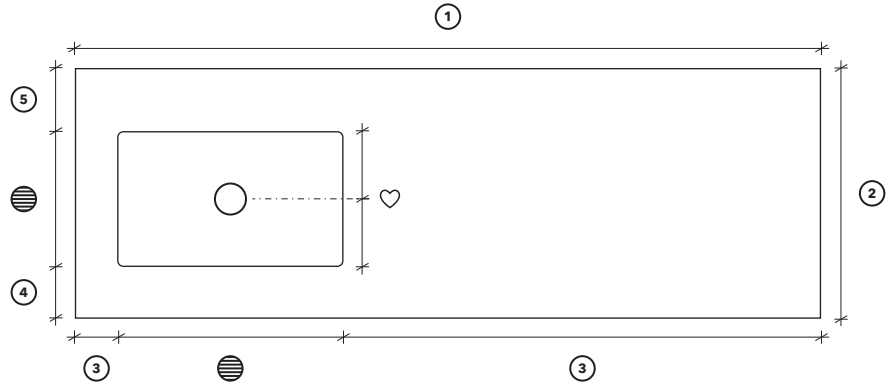

Make a choice between a single or double bowl washbasin and fill in positions 1-5 or 1-6 accordingly.

Next step is to define the size of the bowl(s) indicated by the  - symbol. Go to page 24 and 25 for Base bowl sizes.

SINGLE

-  bowl size
- ① max. 5000mm
- ② max. 550mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow

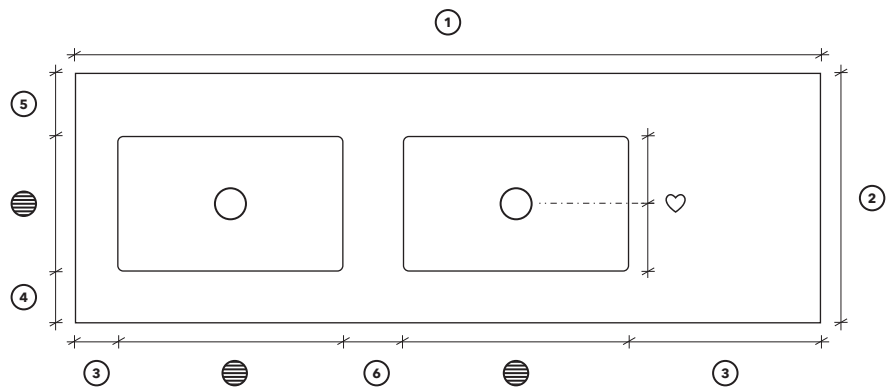

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

DOUBLE

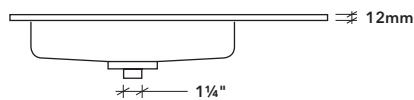

-  bowl size
- ① max. 5000mm
- ② max. 550mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow
- ⑥ min. 50mm

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

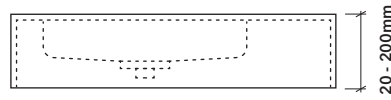

Edge

Base washbasin can be supplied with a 12mm top or with an edge from 20mm up to 900mm. In order to conceal the bowl, Not Only White recommends an edge height as mentioned on pages 24 and 25 at the 'Bowls' section.

Tap hole

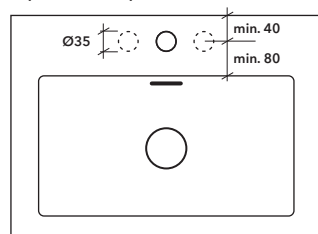

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

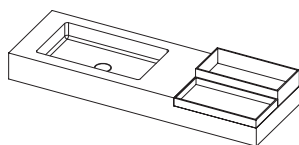

Top-mounted tap with overflow:

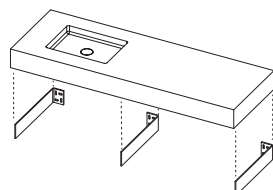

Basq trays

Base washbasin can be supplied with a plateau on the side for Basq trays. Please refer to page 10 and 45.

Brackets and ribs

Please refer to page 11, where brackets and ribs are explained, to find out what type of support is needed for your washbasin.

Drain type

Depending on how the washbasin needs to look and work, you can choose from different drain types for Base.

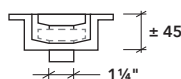

1 FLUSH DRAIN free flow drain

Base bowls are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

2 POP-DOWN DRAIN closable drain

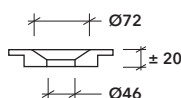

Our Pop-down drain has the same aesthetic as the Flush drain but it can be pressed down to close the drain.

Pop-down drain is calculated per bowl

For use with the Pop-down drain, Not Only White recommends to equip the bowl with an overflow.

3 DR72 DRAIN HOLE for a third party drain

The DR72 drain hole is used for third party drains, both closable and non-closable.

DR72 drain is free of charge

Not Only White recommends to pair a third party closable drain with an overflow.

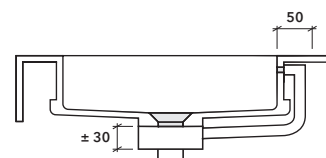

Note: when choosing a pop-down drain we recommend an overflow and extra edge height of 45mm. With a pop-down drain only we recommend an extra edge height of 15mm.

Overflow

An overflow (code **OH50**) is used for bowls equipped with a closable drain.

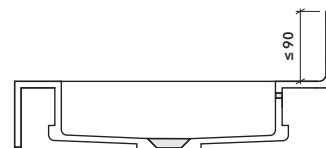

The overflow drain tube needs 50mm at the back of the washbasin to fit.

The overflow ring, that drains excess water into the drain, adds 30mm of height underneath the basin drain.

Integrated backsplash

Not Only White offers an integrated backsplash on Base washbasins (code **CSP90H**) with a maximum height of 90mm.

Note that a backsplash with a height over 90mm will be supplied as a separate piece without a radius edge.

Separate backsplash is calculated per m²

Himacs White

Box

Box collection is the answer to a tidy bathroom. Finally, everyday items like hairbrush and toothpaste have a home of their own. The Natural Oak tray from the Basq collection contrasts with the sleek white Himacs to give a surprising twist to the subtle design. Box is also available in Himacs only without the Basq tray.

Box is defined by a spacious rounded bowl, available in both single and double versions. The seamless round shape allows for easy maintenance.

1 FLUSH DRAIN free flow drain

Box bowls are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

2 POP-DOWN DRAIN closable drain

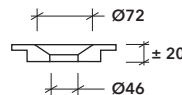

Our Pop-down drain has the same aesthetic as the Flush drain but it can be pressed down to close the drain.

Pop-down drain is calculated per bowl

For use with the Pop-down drain, Not Only White recommends to equip the bowl with an overflow.

3 DR72 DRAIN HOLE for a third party drain

The DR72 drain hole is used for third party drains, both closable and non-closable.

DR72 drain is free of charge

Not Only White recommends to pair a third party closable drain with an overflow.

Note: when choosing a pop-down drain we recommend an overflow and extra edge height of 45mm. With a pop-down drain only we recommend an extra edge height of 15mm.

Cut-outs and edge finishes

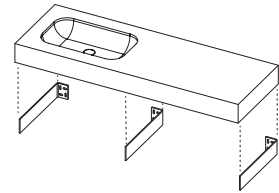

Please refer to page 10.

Materials and colors

Himacs White

Brackets and ribs

Please refer to page 11, where brackets and ribs are explained, to find out what type of support is needed for your washbasin.

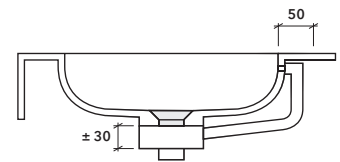

Overflow

An overflow (code **OH50**) is used for bowls equipped with a closable drain.

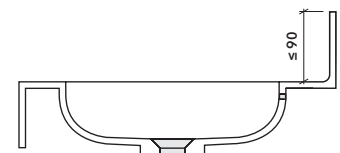

The overflow drain tube needs 50mm at the back of the washbasin to fit.

The overflow ring, that drains excess water into the drain, adds 30mm of height underneath the basin drain.

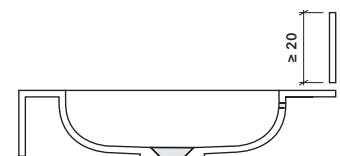

Integrated backsplash

Not Only White offers an integrated backsplash on Base washbasins (code **CSP90H**) with a maximum height of 90mm.

Note that a backsplash with a height over 90mm will be supplied as a separate piece without a radius edge.

Separate backsplash is calculated per m²

Form

The Form's linearity gives the collection its signature clean and serene look. The rounded Flush drain, however, punctuates all the straight lines in a surprising and yet pleasing manner.

Next to the basin a lower plateau can be integrated to create a platform for a mounted tap or a space to place soap or other bathroom accessories.

Design by Marike Andeweg

○ White Himacs

Washbasin layout

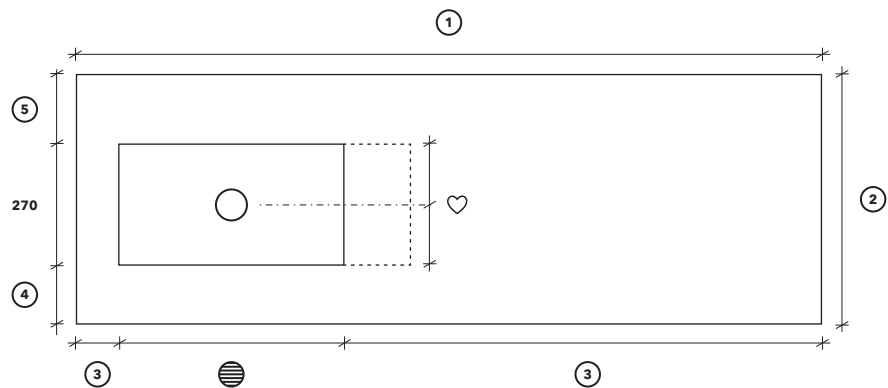

Make a choice between a single or double bowl washbasin and fill in positions 1-5 or 1-6 accordingly.

Next step is to define the size of the bowl(s) indicated by the  - symbol. Go to page 46 for Form bowl sizes.

SINGLE

-  bowl width
- ① max. 5000mm
- ② max. 550mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow

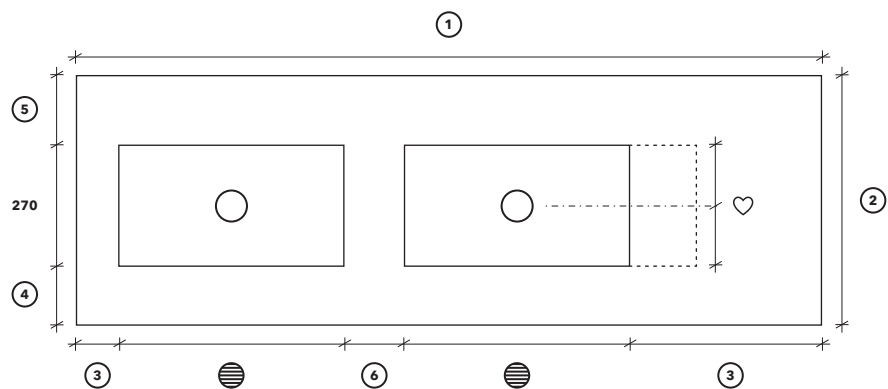

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

DOUBLE

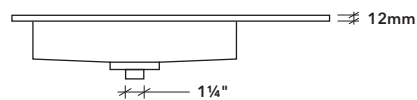

-  bowl width
- ① max. 5000mm
- ② max. 500mm
- ③ min. 35mm
- ④ min. 30mm
- ⑤ min. 30mm
min. 50mm with overflow
min. 80mm with tap hole
min. 120mm with tap hole + overflow
- ⑥ min. 50mm

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

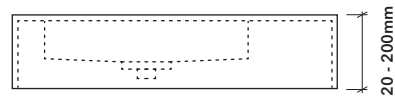

Edge

Form washbasin can be supplied with a 12mm top or with an edge from 20mm up to 900mm. In order to conceal the bowl, Not Only White recommends an edge height as mentioned on page 46 at the 'Bowls' section.

Aim

Tasked with the brief of reinterpreting nostalgia in a contemporary context, Dutch designer Joost van der Vecht studied the characteristics of basin design throughout the last century, with the result being the Aim washbasin.

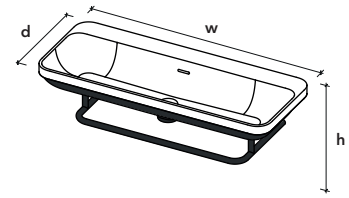

The essential edge detail on the outside anchors the sleekness of the overall look. The inside of the bowl is soft and rounded which is extended into detail in the almost invisible vaulting of the overflow. In order to accentuate the fluidity in the finer details, solid surface material Velluto® was chosen for Aim. The black Soft Touch coating creates tactility and interest to the base of the bowl, a design element which is often hidden.

Design by Joost van der Vecht

Fall

Generous volumes in soft hues characterize Fall collection by designer Joost van der Vecht. A series of 3 countertop models, where the need for space determines the choice.

The concept is based on a play with height. Fall comes in a height of 180mm, 270mm and 360mm. The high Fall basin of 360mm will naturally be placed on a shelf closer to the floor which results in a nifty volume next to basin for accessories.

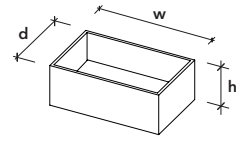

Fall has a soft minimalist appearance due to its straight lines combined with the smooth color tints of Himacs like Sea Oat Quartz, Peanut Butter and White Quartz.

Frame

The open structure of the Frame collection literally frames and reveals the shape of the basin above. This partnership is best expressed when paired with the Blend whereby the straight line of the metal Frame is contrasted with the sinuous underside of the basin.

The Frame offers sufficient storage space yet at the same time stays transparent and unobtrusive. The shelf is made of 9mm Himacs.

Fuse

The distinctive character of the Fuse is the amalgamation of straight and curved lines. The organic-shaped basin with the subtle but sinuous integrated overflow on the inside is punctuated by the straight lines on the outside. The back edge where Fuse is mounted on the wall is set lower to create a floating effect and shelf space at the same time. The bottle trap is almost concealed underneath the basin to make the Fuse an object.

Fuse is available in white Velluto® biobased and with a dark blue and silk grey Soft Touch coating on the outside.

Nest

Nest is an elegant, slim-edged countertop washbasin made of white Velluto® biobased. The collection offers a round, square and rectangular model. The round model is also standard available with a silk grey Soft Touch coating.

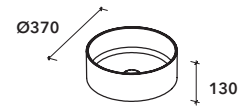

Depending on the styling of the overall setting, Nest can create a simple and pure feeling. Yet by introducing elements like a marble shelf and copper tapware, Nest can achieve the ultimate classical and luxurious look.

Nest collection is perfectly suitable for residential as well as commercial projects. Especially with our Palette finish and haptic Soft Touch coating unique designs can be created that suit your bathroom design.

Noon countertop

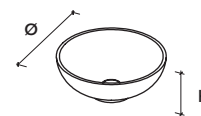

Noon countertop is a friendly and bowl-shaped basin made out of Himacs that can be placed on top of our Flat shelf or a cabinet from a third party. The foot elevates the Noon from the surface, allowing for easy maintenance and adding an extra dimension to its appearance.

Design by Marike Andeweg

Specifications

- delivered with our Flush drain
- Noon countertop bowl should be fixed on top of a surface using flexible silicon

Pose

Pose collection is a serie of round and square pilars. The matte white columns have a thin edge of 10mm and are made of the high quality solid surface material Velluto® biobased.

Because of its noble appearance, Pose collection can effortlessly be used in many styles. Be it at home or in a commercial environment. To give it an individual signature, the complete product can be colored with our Palette finish. Or emphasize only the outside of Pose with our tactile Soft Touch coating.

Creating a luxurious, modest bathroom has never been this easy.

Scape

Scape collection consists of a series of black and white floor-standing Models. Carefully chosen ratios and the right mix of color and material make Scape an intriguing object. The collection takes its name from 'landscapes' in which the various inlays create different sceneries by its interaction with the Himacs monolith.

Design by Joost van der Vecht

Leaf

A modest design, that matches with all our basins.

At Not Only White we aim to keep it simple. But always distinctive. This is how our Leaf tap series was born.

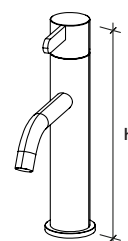

What makes this design appealing is the 5cm long lever with rounded grip for easy use. The shape of the lever is inspired on the leaves of the Pagoda tree.

Design by Marike Andeweg

Axis

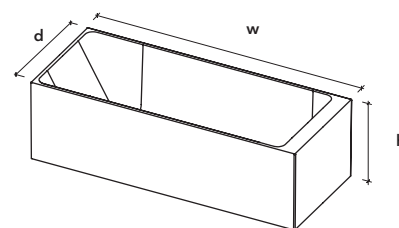

The Axis bath is a free-standing, rectangular bath with rounded internal lines. The sloping side, combined with its generous proportions, makes the Axis a wonderfully comfortable bath tub. The overflow is subtly integrated within the tub and the drain plug is made of the same material as the bath.

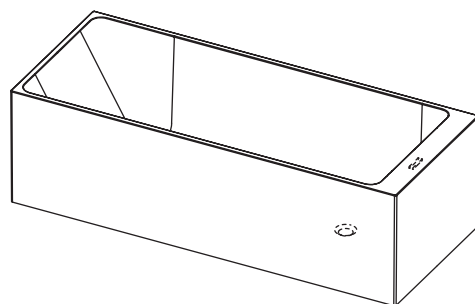

Axis bath is made of Velluto® biobased, which can be perfectly combined with the white Himacs of our Not Only White custom made basins.

Specifications

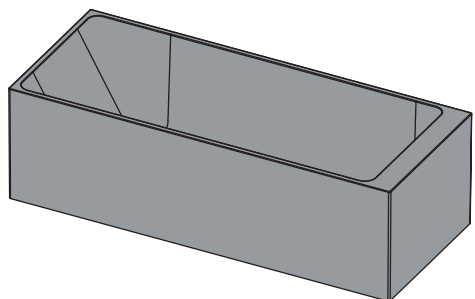

- including pop-up waste kit with Velluto® cover and 1 ½" bottle trap
- with integrated overflow
- not fit for third party fill or overflow systems
- optional: Palette finish in NCS or RAL color
- optional: Soft Touch coating in NCS or RAL color

Ease

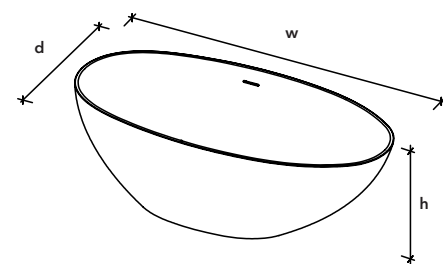

Ease bath is best described as a warmly, playful asymmetrical design but with an almost sculptural appearance. Because of its compact dimensions this bath fits easily in smaller bathrooms while keeping its spacious, luxurious look.

With its comfortable inner lines, Ease bath creates a wonderful bathing experience. And when not in use, a beautiful object to look at.

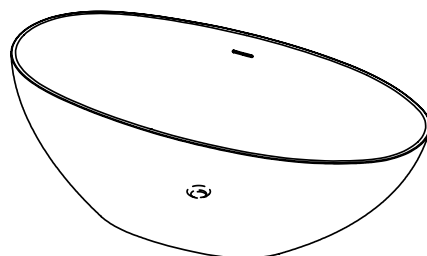

Specifications

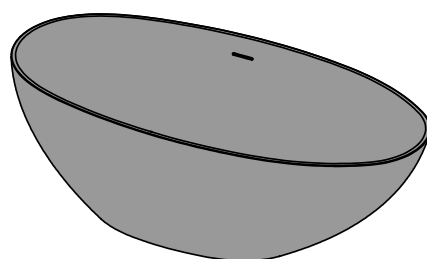

- including pop-up waste kit with Velluto® drain cover and 1 ½" bottle trap
- with integrated overflow
- not fit for third party fill or overflow systems

Loop

Loop FLP01
Private residence
Interior design by Studio Niels
Photography by Serge Technau

This free-standing egg-shaped bath is all about an elegant play of lines. The overflow is subtly integrated within the tub and the drain plug is in the same material as the bath.

Loop bath is made of Velluto® biobased. Especially designed for the Loop bath, the Loop bath tray hugs the curves of the tub. With one's favourite magazine, candle and drink within easy reach, bathing is more relaxing than ever.

Base handrinse

As the name suggests, the Base handrinse is a collection of basic-shaped models. It is characterized by the 12mm radius inside the basin.

This collection aims to be accessible, adaptable and easy to maintain. Not only is Base perfect for the domestic environment, but its characteristics also make Base an ideal choice in hygienic surroundings and intensively-used restrooms.

Design by Marike Andeweg

Base Light handrinse

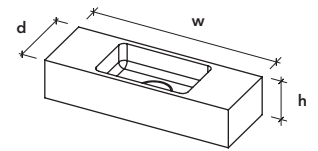

Base Light handrinse is the slim sibling of the Base handrinse collection. With an overall depth of 14 centimeters and a wall thickness and inside radius of only 9 millimeters, Base Light is the compact solution for small spaces.

This collection aims to be accessible, adaptable and easy to maintain. Base Light is perfect for the domestic environment.

Base Bold handrinse

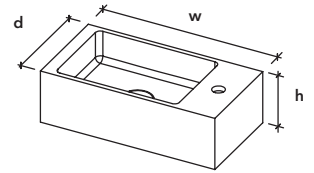

Base Bold handrinse is the big brother of the Base handrinse collection. The bigger bowl gives you a bit more space to freshen up.

The Base Bold handrinse is like the other models in this collection: accessible, adaptable and easy to maintain. A welcome solution for your sanitary space.

Design by Marike Andeweg

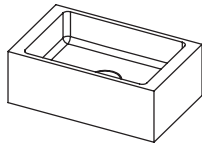

Specifications

- delivered with our Flush drain
- delivered as wall-mounted version including mounting holes in the back edge
- standard size tap hole Ø30mm; for UK Ø35mm
- Base Bold handrinse Models are also available in top-mounted versions

Drain type

Depending on how the handrinse basin needs to look and work, you can choose from different drain types for Base handrinse.

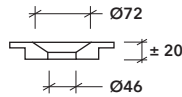

1 FLUSH DRAIN free flow drain

Base handrinse bowls are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

2 DR72 DRAIN HOLE for a third party drain

The DR72 drain hole is used for third party drains.

Not Only White recommends to use a free flow drain.

DR72 drain is free of charge

Overflow

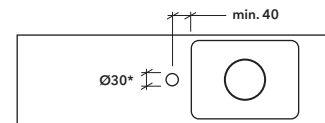

An overflow is not possible.

Tap hole

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

* Tap hole for UK 35mm

Mounting holes

To install a handrinse basin to the wall, Not Only White can provide mounting holes (code **OVHL**) in the back edge.

Handrinse basins up to 600mm need two holes. Any handrinse basin wider than 600mm, we advise to have an extra hole up to 1.2m and two extra holes up to 2m.

Please refer to **Ribs** for handrinse basins that need to be mounted on a cabinet. In this case mounting holes won't be needed.

Ribs

Please refer to page 11.

Blend handrinse

The Blend handrinse is the smaller version of the Blend basin. The top of the organic-shaped basin fluidly forms the 6 centimeters high backsplash giving the Blend handrinse a nostalgic look.

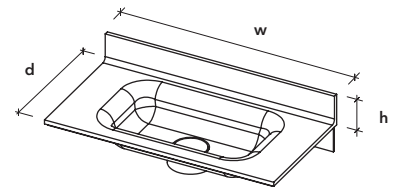

The Blend handrinse is also available with an edge and both models are equipped with the Flush drain made out of Himacs, just like the basin itself.

Blend handrinse

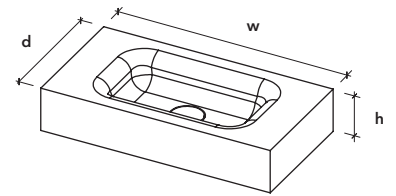

What makes the Blend collection so special is the fusion of the organic-shaped bowl with the linear top. The invisible design of the Flush drain fits the Blend perfectly. Blend invites you to touch it.

The curved design of the bowl allows for easy maintenance.

Handrinse layout

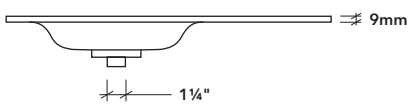

Fill in positions 1-5.

- ① max. 5000mm
- ② max. 400mm
- ③ min. 35mm
min. 90mm with tap hole
- ④ min. 30mm
- ⑤ min. 30mm
min. 80mm with tap hole

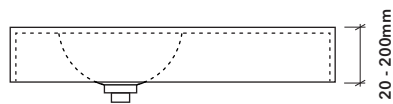

Edge

Noon handrinse can come with a front and back edge. In order to conceal the bowl, Not Only White recommends an edge height of 135mm.

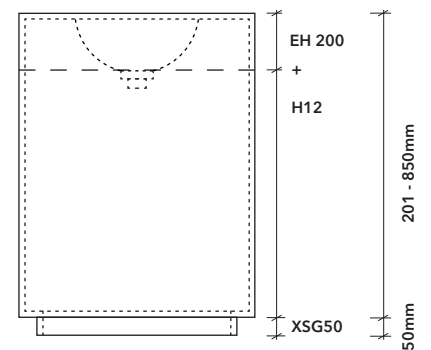

H12
12mm top sheet

EH100
Edge 20 - 100mm high

EH150
Edge 101 - 150mm high

EH200
Edge 151 - 200mm high

EH200 + remaining m² in H12
Edge 201 - 850mm high

XSG50
50mm plinth for floor-standing model

Bowls

CHNN01
 Ø248 x h116mm
 rec. edge height 135mm

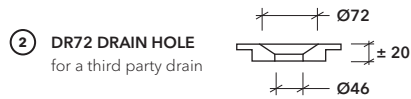

Drain type

Depending on how the handrinse basin needs to look and work, you can choose from different drain types for Noon handrinse.

Noon handrinse bowls are standard equipped with a free flow drain. This drain allows water to flow through at all times and cannot be closed.

Free flow drain is free of charge

The DR72 drain hole is used for third party drains.

Not Only White recommends to use a free flow drain.

DR72 drain is free of charge

Overflow

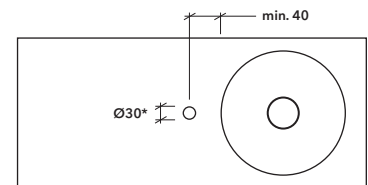

An overflow is not possible.

Tap hole

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

* Tap hole for UK Ø35mm

Brackets and ribs

Please refer to page 11, where brackets and ribs are explained, to find out what type of support is needed for your washbasin.

Cut-outs and edge finishes

Please refer to page 10.
